PROFESSIONAL EXPERIENCE

Senior Frontend Developer | 2023–now
FirstCity

- **Rebuilt a legacy AngularJS codebase into modern Angular (v13)**, focusing on delivering a **flexible**, **scalable**, and maintainable architecture suitable for a large-scale project. Applied **clean software architecture** principles to ensure long-term code quality, modularity, and team productivity.
- **Developed a live 3D interactive map system** for **Jamarat** during Hajj, enabling **real-time monitoring** of crowd movement and situational data. This tool empowered **decision-makers** with instant visual insights, significantly improving **response times in emergencies** [View Demo].
- **Built a separate real-time visualization system** for **train operations during Hajj**, tailored to ensure **safety and efficiency**. The system provided live status updates and alerts, helping **control teams make faster decisions** and prevent **operational issues** [View Demo].
- **Designed and developed a high-performance 3D Interactive Map module** as the core visualization tool for Hajj monitoring systems. This module integrates **18 submodules**, covering over **90% of live operational data**, and delivers real-time insights with no performance lag. It supports multi-user control based on **roles and permissions**, enabling different types of users to interact with the system according to their access level, improving operational coordination and decision-making.
- **Monitored and mentored co-op students**, providing hands-on training in **programming languages**, **software frameworks**, and software development best practices. Also supported their growth in **communication** and **team collaboration skills**, helping them become more effective and confident contributors.
- **Collaborated closely with mid-level developers** as a senior team member, focusing on mutual growth through code reviews, pair programming, and shared learning. Helped improve **technical depth**, **code quality**, and **team cohesion**, driving continuous improvement across the team.
- Designed and implemented a high-performance **bulk batch rescheduling tool** (**"Reshuffle Bulk"**) that processes and updates thousands of batches (e.g., 3000+) **entirely on the frontend**, reducing processing time from potentially hours on the backend to under one minute, greatly enhancing system responsiveness and user productivity.
- Monitored and supported development of the **Tafweej mobile app**, including a high-impact **live tracking system**, ensuring quality, performance, and alignment with business goals, which led to a successful launch and strong user engagement.

System Developer (ERP System) | 2021/12 – 2023/03

Almabani

- **Developed and maintained over 70** modules for Almabani's in-house ERP system (**AlmaERP**), covering critical areas such as **Accounts**, **HR**, **Invoicing**, and **Time Sheets**.
- Built responsive, data-driven interfaces using **Angular v11** and **pure CSS**, focusing on performance, usability, and clean design.
- Built responsive UIs and dashboards to display complex business data in charts, tables, and summaries.
- Collaborated with teams to ensure a **scalable**, **modular**, and user-friendly ERP platform.
- Led **the design and development** of the new company website using **Angular (SSR) and Laravel.**.
- **Received direct recognition from the Chairman** for outstanding work on the company website project and its impact on the company's digital presence.
- Designed and developed the company's **ERP mobile app** from scratch using **Ionic**, replicating over **70 modules** from the in-house AlmaERP system (Accounts, HR, Invoicing, Time Sheets, etc.).
- Led the **architecture** and **development** to ensure a seamless, scalable mobile experience consistent with the web ERP platform.

Full stack Developer | 2020/12 – 2021/12

Jaraah

- building ERP system each department : IT , HR , Sales , enginners.
- build new website for company (Angular , express.js , MySQL)
- Collaboration between the marketing and sales department to analyze data.
- Analyzing codes regularly to ensure accuracy, functionality, and performance.
